THÜRSDAY, JANUARY 6, 1842. [Augusta Correspondence.] State House, Augusta, WEDNESDAY, Jan. 5, 1842.

The Convention of Representatives was called to ofder by Mr. Smart of Troy, on whose mo-, ments. tion Mr. Dunn of Paland was called to the chair. After the credentials of members had ben tes ceived, and examined, the Governor and Council came in and qualified them to act. The Convention then made choice of William T. Johnson of Augusta, Clerk, and " God save the State of Maine, Charles Andrews of Turner, Speaker. Mr. Andrews, I understand, received n majority of three votes in caucus out of one hundred and twenty; the contest was close and severe, but as the Locos have determined that no inen is to be put forward, except such as distinguished themselves in the ever to be remembered, Aroostook Expedition, the result was that Andrews outstripped his competitor, who had no such recommendation. The friends of McDon- from labor when the eye of the employer is not ald are somewhat chagrined, but there is nothing to be gained by crying over spilt milk. We have received the Report of the Land Agent. On the subject of the Boundary it recommends that the Legislature of this State with the co-operation of Massachusetts present to the General Government, some basis for the settlement of a new boundary line upon reciprocal terms. We shall give an abstract of the report at the earliest day.

Encouragement to Home Industry.

A correspondent of the Philadelphia Sentinel has been for some time engaged in writing a serice of articles on the subject of protecting the industry of the United States. The subject is one of west importance, as in it is concerned the only true remedy for the financial evils under which the country new labors. It comes home to the business and bosom of every man engaged in any of the branches of the industry of the country; it is of vital importance to the The Grand Jury of New York have producing classes and all dependent upon their great industral interests of the country, and the practical aid of every man and every woman is needed to encourage industry about home in their own town and neighborhood.

That our readers may have an idea of the interest taken in this matter, we give the following romarks from the author alluded to

"Since the beginning of the present series, in all parts of the country a growing interest in the question is mainlest. Let me recapitulate these signs of the times. First, in the State of Maine, her able editors in Portland and Bangor have directed the attention of the citizens of those places to the importance of manufacturing for themselves; then follows Massachasetts every where: and so on all through the Eastern States; then West, at Michigan, at Illinois, at Ohio; then there is the Mechanics' Association of Louisville, \mathbf{K} entiicky, and the able pens to back them

then at Nashville, Tennesse then at Louisia ia, an able writer upon the subject of the sugar trade, and the necessity of taking care of ourselves and lastly, unumerable letters and acknowledgements personally to the writer, urging him not to slacken his efforts to promote the real prosperity of the country. All these indications theer him on not for himself, but for his nation. It is apparent that party has nothing to do with these matters. The people of this country are, private entry, properly restricting the transfer of fortunately, too well informed as to their true the scrip, or the sale of the land. lodgings at the Tremont, and is determined to interests, to be led away by the cry of delusion. which the "free trade radicals" raise against every man who will not acknowledge their foreign notions. · Against the positions assumed by the writer,

some data is extracted from Blackwood's Magazine, by some of these learned geniuses who penned it with all the importance of unquest onable logic. They present it in this shape: First, manutactures, aided by protective duties, increase population, wealth, and commerce, but says the champion, it also increases, in an immense ratio, the sickness, poverty, pauperism, and crime of as well as to all experience, to support such a position. There is at this moment of time a greater number of laborers, operatives, mechanics, and people generally, out of employ in this country, than ever was known before. I prove the cause of this to be the result of the policy of the country, that gives employment to foreign labor in other countries, whilst it diminishes it at | audacity and the extent of their depredations.' that consequently the specie basis of commercial transactions being withdrawn, all the superstruc-ture falls with it. I show that as a Nation, and as States, and as a people, we are, from the same presentments into retirement in a word, that if cause, becoming deeper and deeper in debt, whilst tie, declining more and more; and I point out the remedy by Certainties derived from actual for our, Jew or Contile always save and excepdata; may more, I show that not only is there ting only Issac Hill, he wishes it now to be for more people unemployed and destante; but I show, from the same cause, that there is more crime, wretchedness, amnorably, dinnkenness, and absence of morality and honesty, than was ever known; and then when I am told, if I point ILF Little men love tall women, and little wo- the attention of the statesman, the patriot and the philanthropist to the means of removing all this, by making a substantial change in our poli- bout two hundred. When the advocates of free trade radgalism can compress the broad limits of these United States into the narrow ones of England, Scotland, Wales and Ireland, it will be time enough to meet such effections.

" Mutipy and Murder,

Two seamen named John H.-Davidson and Charles P. Martin arrived at New York in the United States Brig Dolphin, having been sent home by the U. S. Consul at Carthagena, charged with mutiny, murder and robbery, on board the brig Cicero, of Baltimore, which vessel left the latter port on the 2d of May last, and was anchored at the time of the outrage on the coast of San Blas. Davidson, Martin, and another seaman named Wallis, stabbed the captain, mate, and a scaman named Brown. The officers, with the cook, succeeded in getting into the boat, and reaching the shore; but Brown, after heang stalled, jumped overboard and was drowned. The mutineers then robbed and abandoned the vessel Davidson and Martin were subsequently arrested and sent to Carthagena, but Wallis escaped and took refuge among the Indians. The men were placed in the custody of the U. S. Marshal and committed to prison.

The sales of land during the first three quarters of 1841 are stated in this report to have been 118,072 39-100 acres; and the purchase money amounted to \$1,024,873 43. The receipts into the Treasury, \$1,104,063 06.

The quantity of land prepared for market but not yet advertised, is 9,876,142 acres; some further legislation is, however, necessary before five million acres of it can be proclaimed. The surveys the past year have been carried on in Louisiana, Arkansas, Michigan, Wisconsin, lowa, Illinois, Missouri, Missippi and Alabama. These have embrabed the usual quantity of land.

An agent is at present employed in an examination of the several land offices, none of which have been subject to an investigation since the origin of the land system.

Numerous claims to the preemption privilege have been suspended, because they were for quantities of land exceeding the amount authorized, or for defect in proof, error in location,

Meantime many of the Poles are dead; some have obtained temporary employment; others have left the country; and most of them are poor. Weep not the early dead, Who, like some blossom fair. Raising its young imbower'd head, And sweet ning all the air. Wither'd alas though fost ring skill, Tired with the task its hope fulfil.

Oh, weep them not, though torn From heart's embracing ties, And left the stranger fabric shorn, Of grace and combiness: As when the oak, of branches reft, Has naught but nak'd ruin left.

Suppress the gushing tear, Though lovely ones are gone From sight beyond this murky sphere, And never to return. Nay, rather mourn, could any power Back to this life their clay restore

OR VEGETABLE UNIVERSAL MEDICINE CURATIVE

French College of Health, in Paris. tHE following letter was received yesterday by mail from Salem. It gives another evidence of the great success of Locatine's Vegetable Universal Puls.

Sin I have been for many years a sufferer from the ravages of Scrofula and Cancerous Humors, which at last seated on the vitals, and exhibited all the threatening symptoms of consumption. The general inutility of all remedies awakened my enquiries as to the thousand different methods of cure, to prost of which I had recourse without receiving benefit. I accidentally noticed a remarkable cure by Larraine's Pills and was induced to give them a trial. I sent to Boston and got a box. By the use of them I found immediate relief and was soon restored to a perfect state of health.

The following letter from J. B. Light, Esq. is wor-

SIR It ook one of Lorrnine's Vegetable Pills last evening for a pain in my head; that had effected me for several days, occasioned by taking cold. I soon felt very calm, and quiet, and a state-of general pose came on which had great charms, and I enjoyed one of the most comfortable and refreshing nights rest that I ever did in my life. I rose in the morning in my transl state of health, and believe it is my duty to recommend this medicine.

We know a lady of this city whose hair was so nearly gone as to expose entirely her phrenological developements, which, considering that they betokened a most amiable disposition, was not in reality very unfortunate. Nevertheless she mourned the loss of locks that she had worn, and, sicer a year's fruitless resort to miscalled restoratives, purchased, some months ago, a bottle or two of Oldridge's Balm, and she has now ringlets in rich profusion, clossy, and of raven black.
